

SYSTEM 2000™ COMPACT

SUPER CONCENTRATE

DILUTION CONTROL

System 2000™ Compact is a safe, economical and easy-to-use dilution control system. It combines color and number-coding, sealed chemical bottles, user safe, super concentrated chemicals and state-of-the-art e-gap proportioners to deliver the latest in cleaning technology. Worker safety, productivity and performance are all enhanced with System 2000™ Compact.

SAFETY

- Closed-loop bottle design eliminates chance of accidental contact with products
- Color-coded containers, secondary labels and literature increase safety and make training easy
- All System 2000 products are formulated with the environment and user safety in mind

EASE OF USE

- Easy-to-understand trilingual (English, Spanish and French) directions on concentrates and secondary labels
- Push button accuracy for easy diluting at all times
- 1900 ml bottles are easy to handle and store, thereby eliminating lifting of heavy containers

SAVINGS

- System 2000 products are super concentrated – up to 90% savings over ready-to-use aerosol and pre-packaged quart products
- Accurate dilution of super concentrates increases savings compared to standard products
- Inventory, shelf space, freight costs and packaging waste are reduced

SPECIAL FEATURES

ADAPTABILITY

- Modular units are easily connected together
- Right or left water connection makes installation simple
- Flexibility in dilution ratios through a simple change of metering tip

ADVANCED E-GAP

- Reliable state-of-the-art e-gap eductors
- Eliminates foam and splashing
- Manufactured to ASSE Standard 1055B. Carries international and domestic certification
- Very low maintenance - liming and scaling are virtually eliminated

CLOSED-LOOP

- Unique closed-loop design is the ultimate safety feature preventing accidental contact with chemical
- System is activated by simply screwing cap onto concentrate
- Draw tube included with every bottle assures reliable product delivery every time
