Definitions of Criteria

- 1 Indicates that the ingredients used in these products are biodegradable in the environment as well as in wastewater sewage treatment plants according to the Organization for Economic Cooperation and Development (OECD) Guidelines for Testing of Chemicals.
- 2 Made with ingredients from renewable plant and animal sources. High biobased content equals 51%-90% per the Biobased Manufacturers Association.
- 3 Contains <0.50% phosphorous per Green Seal (GS-37) requirements and New York Environmental Conservation Law (Article 35, Title 6, Section 659.3).
- 4 Meets OSHA Hazard Communication Standard and meets/is exempt from DOT Hazardous Material Regulations (49 CFR 173.136).
- 5 Meets the requirements put forth by the Organization for Economic Cooperation and Development (OECD) Guidelines for Testing of Chemicals as outlined by Green Seal (GS-37).
- 6 Meets GS-37 Section 4.9.
- 7 Indicates the flashpoint is >150°F per Green Seal (GS-37) Requirement 4.15.
- 8 Nonylphenol ethoxylate (NPE) and Alkylphenyl-ethoxylates (APEO).
- 9 Sodium ethylenediaminetetraacetic acid (EDTA)
- 10 Includes butyl (2-butoxyethanol) and all other "e" and "p" series glycol ethers.

* pH listed can deviate by +/- 0.5

What is a Biobased Product?

Biobased products are made with ingredients from renewable plant, animal or marine resources. Because of this, they have less impact on the environment than their petroleum-

based counterparts and are almost always biodegradable. A great example of a biobased product is bar soap which is made by reacting an alkali (lye) with vegetable oil.

How is Biobased Content Defined?

For a product to be truly biobased, it must have a biomaterial content of 90% or more (apart from any water and inorganics). The vast majority of cleaning compounds contain less than 90% biomaterial and fall into one of three categories:

High Biobased Content

Defined as 51% - 90%

Moderate Biobased Content

Defined as 21% - 50%

Low Biobased Content

Defined as 20% or less

Six of Essential's DCS products fall into the **High Biobased Content** category. Each is also Green Seal™ Certified (GS-37):

Glass Advantage 41

Ultra Spray Cleaner 42

Daily Restroom Cleaner 43

Cleaner/Degreaser 47

Multi-Purpose Cleaner 48

Peroxide Concentrate 52
