

# Green program

## Environmentally-Preferred Cleaning Products

Essential Industries recognizes that maintaining the completeness of the world's environment is the responsibility of everyone. With our company's history tracing back to 1898, we take this responsibility seriously and have developed the Green Program, an integrated system of products, training and packaging that have been developed with the environment and user-safety in mind.

Our Green Program's daily and weekly cleaning products exceed all current environmental regulatory requirements. A complete listing of these products and their environmental definitions is found on the back of this sheet. Additionally, all appropriate products are U.S. EPA registered.

All Essential Industries' products have met our own stringent internal standards of safety, reliability and effectiveness to provide our customers with a safe and healthy environment in which to work.

Essential's Green Program is an integrated system including:

- Environmentally-conscious products specifically designed for daily and weekly facilities' maintenance.
- Training videos, manuals and wall charts designating products to use and the appropriate procedures for using these products in a uniform manner.
- DCS Dilution Control System products including six Green Seal™ Certified general purpose cleaners.
- Green Essence floor care products including Green Seal Certified floor finish, stripper and cleaner.
- Standardized packaging that is recyclable.
- Technical support and field assistance.
- High quality control standards.

Essential Industries' Green Program is available to address the concerns you may have regarding the environment and the impact of the products you use in your facility. Our sales team welcomes the opportunity to discuss this important program with you.

Essential Industries has developed a line of daily and weekly cleaning products that meet or exceed the product content requirements of California, and the product labeling requirements of New Jersey and Pennsylvania. These states have set forth the strictest requirements for products of this type. All products listed currently exceed all federal and state environmental regulations.

Products	Criteria											
	Biodegradability	Non-Butyl	Non-Corrosive	Non-Flammable	Non-Acid	No Petroleum	California Code	Phosphate-Free	SARA 313	Non-Toxic	No VOC's	
Blue Window Cleaner #103GC	✓		✓	✓	✓	✓	✓	✓	✓	✓	✓

## Definitions of Criteria

### BIODEGRADABILITY

Evidence indicates that the ingredients used in these products do not bioaccumulate and are biodegradable in the environment as well as in wastewater sewage treatment plants.

### NON-BUTYL

Determination is made on the presence of 2-butoxyethanol in the product.

### NON-CORROSIVE

Meets OSHA Hazard Communication Standard (29 CFR 1910.1200) and DOT Hazardous Material Regulations (49 CFR 173.136).

### NON-FLAMMABLE

Meets OSHA Hazard Communication Standard (29 CFR 1910.1200) and DOT Hazardous Material Regulations (49 CFR 173.120).

### NON-ACID

Determination is made on the presence of acid in the product.

### NO PETROLEUM

Determination is made on the presence of petroleum distillates in the product.

### CALIFORNIA CODE

Contains no components at significant levels known to the State of California to cause cancer, birth defects or other reproductive harm. Meets Safe Drinking Water and Toxic Enforcement Act of 1986, California Code of Regulations (Title 22, Division 2, Chapter 3).

### PHOSPHATE-FREE

Meets New York Environmental Conservation Law (Article 35, Title 6, Section 659.4).

### SARA 313

Contains no SARA 313 Reportable Chemicals and meets EPA Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (49 CFR, Part 372).

### NON-TOXIC

Meets OSHA Hazard Communication Standard (29 CFR 1910 Subpart Z).

\* Due to the inherent nature of quaternary-based disinfectants, they will not meet OSHA Hazard Communication Standard (29 CFR 1910 Subpart Z).

### CONTAINS NO VOC'S

Product does not contain any VOC.
