

# ESSENTIAL GREEN

## Environmentally-Preferred Super Concentrates

Essential Industries recognizes that maintaining the completeness of the world's environment is the responsibility of everyone. With our company's history tracing back to 1898 we take this responsibility seriously and have developed environmentally-preferred super concentrates, an integrated system of products, equipment, training and packaging that have been developed with the environment and user-safety in mind.

Our super concentrates exceed all current environmental regulatory requirements. A complete listing of these products and their environmental definitions is found on the back of this sheet. Additionally, all appropriate products are U.S. EPA registered.

All Essential Industries' products have met our own stringent internal standards of safety, reliability and effectiveness to provide our customers with a safe and healthy environment in which to work.

Essential's System 2000 Dilution Control is an integrated system including:

- Environmentally-conscious products specifically designed for daily and weekly facilities' maintenance.
- Super concentrated products that reduce packaging requirements up to 90% versus ready-to-use products, and by up to 75% versus standard concentrates.
- Color and number-coded containers to increase safety and reduce misuse.
- Standardized 1900ml packaging that is recyclable.
- Technical support and field assistance.
- High quality control standards.

# ENVIRONMENTAL PROFILE

Essential's line of super concentrated products meet or exceed all current environmental regulatory requirements, including product content requirements of California and product labeling requirements of New Jersey and Pennsylvania. All products listed have met our stringent standards of safety, reliability and effectiveness.
