# **SAFETY DATA SHEET**

SB Citrus Scrub 'N Shine

| Section 1. Identi  |   |  |  |  |
|--|---|--|--|--|
| GHS product identifier                                     | : SB Citrus Scrub 'N Shine  |  |  |  |
| Other means of<br>identification                           | : 425SB   |  |  |  |
| Product type   | : Liquid  |  |  |  |
| Relevant identified uses o                                 | f the substance or mixture and uses advised against   |  |  |  |
| Not applicable.  |   |  |  |  |
| Supplier's details   | : Essential Industries, Inc.<br>P.O. Box 12   |  |  |  |
|  | Merton, WI 53056-0012<br>Phone: 262-538-1122  |  |  |  |
| Emergency telephone<br>number (with hours of<br>operation) | : 800-843-6174 (24 Hours)   |  |  |  |
| Section 2. Hazar   | ds identification   |  |  |  |
| OSHA/HCS status  | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).   |  |  |  |
| Classification of the substance or mixture                 | : FLAMMABLE LIQUIDS - Category 3<br>SKIN CORROSION/IRRITATION - Category 1<br>SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 1<br>SKIN SENSITIZATION - Category 1<br>CARCINOGENICITY - Category 2  |  |  |  |
| GHS label elements   |   |  |  |  |
| Hazard pictograms  |   |  |  |  |
| Signal word  | : Danger  |  |  |  |
| Hazard statements  | <ul> <li>Flammable liquid and vapor.</li> <li>Causes severe skin burns and eye damage.</li> <li>May cause an allergic skin reaction.</li> <li>Suspected of causing cancer.</li> </ul>   |  |  |  |
| Precautionary statements                                   | <u>s</u>  |  |  |  |
| General  | : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.   |  |  |  |
| Prevention   | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Wear protective gloves. Wear eye or face protection. Wear protective clothing. Keep away from heat, sparks, open flames and hot surfaces No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep containe tightly closed. Avoid breathing vapor. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. |  |  |  |

# Section 2. Hazards identification

| Response                            | : IF exposed or concerned: Get medical attention. IF INHALED: Remove victim to fresh<br>air and keep at rest in a position comfortable for breathing. Immediately call a POISON<br>CENTER or physician. IF SWALLOWED: Immediately call a POISON CENTER or<br>physician. Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off<br>immediately all contaminated clothing. Rinse skin with water or shower. Wash<br>contaminated clothing before reuse. Immediately call a POISON CENTER or physician.<br>IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get<br>medical attention. IF IN EYES: Rinse cautiously with water for several minutes.<br>Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a<br>POISON CENTER or physician. |
|-------------------------------------|---|
| Storage                             | : Store locked up. Store in a well-ventilated place. Keep cool.   |
| Disposal                            | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> </ul>   |
| Hazards not otherwise<br>classified | : None known.   |

## Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture       |
|-------------------|-----------------|
| Other means of    | : Not available |
| identification    |                 |

### **CAS number/other identifiers**

| CAS number   | : Not applicable |
|--------------|------------------|
| Product code | : 425SB          |

| Ingredient name            | %      | CAS number |
|----------------------------|--------|------------|
| Coconut oil diethanolamide | 5 - 10 | 68603-42-9 |
| d-Limonene                 | 5 - 10 | 5989-27-5  |
| Nonylphenol, ethoxylated   | 1 - 5  | 9016-45-9  |
| Isopropyl alcohol          | 1 - 5  | 67-63-0    |
| potassium hydroxide        | 1 - 5  | 1310-58-3  |
| Diethanolamine             | 0 - 1  | 111-42-2   |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

# Description of necessary first aid measures Eye contact : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Inhalation : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

| Date of issue/Date of revision : 1/2 | 2015. Date of previous issue | : 12/22/2014. Version | : 0.03 2/14 |
|--------------------------------------|------------------------------|-----------------------|-------------|
|--------------------------------------|------------------------------|-----------------------|-------------|

# Section 4. First aid measures

| Skin contact | : Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
|--------------|--|
| Ingestion    | : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

### Most important symptoms/effects, acute and delayed

| Potential acute health effe | ,   |
|-----------------------------|---|
| Eye contact                 | : Causes serious eye damage.  |
| Inhalation                  | : May give off gas, vapor or dust that is very irritating or corrosive to the respiratory system.   |
| Skin contact                | : Causes severe burns. May cause an allergic skin reaction.   |
| Ingestion                   | : May cause burns to mouth, throat and stomach.   |
| Over-exposure signs/symp    | <u>ms</u>   |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation                  | : No specific data.   |
| Skin contact                | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur  |
| Ingestion                   | : Adverse symptoms may include the following:<br>stomach pains  |
| ndication of immediate me   | al attention and special treatment needed, if necessary   |
| Notes to physician          | : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask self-contained breathing apparatus. It may be dangerous to the person providing aid give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with wat before removing it, or wear gloves. |

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                               |  |
|---|--|
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                    | : Do not use water jet.  |
| Specific hazards arising from the chemical        | : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.  |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides   |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |
|   |  |

# Section 6. Accidental release measures

| Personal precautions, protec   | tiv  | e equipment and emergency procedures   |
|--------------------------------|------|--|
| For non-emergency<br>personnel | :    | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
| For emergency responders       | :    | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | :    | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | onta | ainment and cleaning up  |
| Small spill                    | :    | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | :    | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers,  |

water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

| Date of issue/Date of revision | : 1/23/2015. | Date of previous issue | : 12/22/2014. | Version : 0.03 | 4/14 |
|--------------------------------|--------------|------------------------|---------------|----------------|------|
|--------------------------------|--------------|------------------------|---------------|----------------|------|

# Section 7. Handling and storage

| Precautions for safe handling                                      |  |
|--|--|
| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Keep away from acids. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in a segregated and approved area.<br>Store in original container protected from direct sunlight in a dry, cool and well-ventilated<br>area, away from incompatible materials and food and drink. Store locked up. Eliminate<br>all ignition sources. Separate from acids. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not store in<br>unlabeled containers. Use appropriate containment to avoid environmental<br>contamination.   |

# Section 8. Exposure controls/personal protection

### **Control parameters**

### **Occupational exposure limits**

| Ingredient name               |              |   | Exposure limits  |   |     |
|-------------------------------|--------------|---|--|---|-----|

| ate of issue/Date of revision | : 1/23/2015. | Date of previous issue  | : 12/22/2014.  | Version : 0.03  | 5/1 |

# Section 8. Exposure controls/personal protection

| •                                |   |
|----------------------------------|---|
| Diethanolamine                   | TWA: 2 mg/m <sup>3</sup> 10 hours.<br><b>OSHA PEL 1989 (United States, 3/1989).</b><br>TWA: 3 ppm 8 hours.<br>TWA: 15 mg/m <sup>3</sup> 8 hours.<br><b>NIOSH REL (United States, 10/2013).</b><br>TWA: 3 ppm 10 hours.<br>TWA: 15 mg/m <sup>3</sup> 10 hours.<br><b>ACGIH TLV (United States, 6/2013).</b><br><b>Absorbed through skin.</b><br>TWA: 1 mg/m <sup>3</sup> 8 hours. Form: Inhalable<br>fraction and vapor  |
| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measured   | es and a second s |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead.   |
| Skin protection                  |   |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.  |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection            | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection           | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.   |
| Date of issue/Date of revision   | : 1/23/2015. Date of previous issue : 12/22/2014. Version : 0.03 6/1  |

# Section 9. Physical and chemical properties

| Appearance                                       |   |
|--|---|
| Physical state                                   | : Liquid  |
| Color  | : Amber   |
| Odor   | : Citrus  |
| Odor threshold                                   | : Not available   |
| рН   | : 11 to 12.5  |
| Melting point                                    | : 0°C (32°F)  |
| Boiling point                                    | : 100°C (212°F)   |
| Flash point                                      | : Closed cup: 44.45°C (112°F)<br>No sustained combustion under required test conditions listed in DOT 173.120(3). |
| Evaporation rate                                 | : Not available   |
| Flammability (solid, gas)                        | : Not available   |
| Lower and upper explosive (flammable) limits     | : Not available   |
| Vapor pressure                                   | : <4 kPa (<30 mm Hg) [room temperature]   |
| Vapor density                                    | : <1 [Air = 1]  |
| Specific gravity                                 | : 0.99 g/cm <sup>3</sup>  |
| Solubility                                       | : Not available   |
| Partition coefficient: n-<br>octanol/water       | : Not available   |
| Auto-ignition temperature                        | : Not available   |
| Viscosity  | : Not available   |
| VOC content                                      | : VOC is applicable to use dilution product.  |
| VOCs are calculated following the requirements u | under 40 CFR, Part 59, Subpart C for Consumer Products and Subpart D for Architectural Coatings.                  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>acids<br>oxidizing materials  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

| Date of issue/Date of revision : 1/2 | 3/2015. Date of previous issue | : 12/22/2014. | Version : 0.03 | 7/14 |
|--------------------------------------|--------------------------------|---------------|----------------|------|
|--------------------------------------|--------------------------------|---------------|----------------|------|

# Section 11. Toxicological information

### Information on toxicological effects

Acute toxicity

| Product/ingredient name    | Result      | Species | Dose         | Exposure |
|----------------------------|-------------|---------|--------------|----------|
| Coconut oil diethanolamide | LD50 Dermal | Rabbit  | 12200 mg/kg  | -        |
|                            | LD50 Oral   | Rat     | 1600 mg/kg   | -        |
| d-Limonene                 | LD50 Dermal | Rabbit  | >5000 mg/kg  | -        |
|                            | LD50 Oral   | Rat     | 4400 mg/kg   | -        |
| Nonylphenol, ethoxylated   | LD50 Dermal | Rat     | >16000 mg/kg | -        |
|                            | LD50 Oral   | Rat     | 3241 mg/kg   | -        |
| Isopropyl alcohol          | LD50 Dermal | Rabbit  | 12800 mg/kg  | -        |
|                            | LD50 Oral   | Rat     | 5000 mg/kg   | -        |
| potassium hydroxide        | LD50 Oral   | Rat     | 273 mg/kg    | -        |
| Diethanolamine             | LD50 Dermal | Rabbit  | 12200 mg/kg  | -        |
|                            | LD50 Oral   | Rat     | 710 mg/kg    | -        |

### Irritation/Corrosion

| Product/ingredient name    | Result                   | Species    | Score | Exposure      | Observation |
|----------------------------|--------------------------|------------|-------|---------------|-------------|
| Coconut oil diethanolamide | Eyes - Severe irritant   | Rabbit     | -     | 100           | -           |
|                            |                          |            |       | microliters   |             |
|                            | Skin - Moderate irritant | Rabbit     | -     | 300           | -           |

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information

### International regulations

Canada inventory

: All components are listed or exempted.

# Section 16. Other information

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.
