

G.P.S.

Grout Penetrating Sealer

A tough, high solid, water-borne sealer that penetrates deep into grout and repels soil and germs while improving slip resistance.

- Dual cross-linking polymer makes this seal ultra-durable against wear and soil penetration
- Highly resistant to acids, bases and stains
- High solids formula fills pores in grouted surfaces
- Meets or exceeds VOC regulations in all 50 states
- Improves traction on floor to decrease slips and falls

STEP 1: Apply G.P.S.

Apply G.P.S. carefully to cleaned and dry grout to minimize clean up on tile.

STEP 2: Clean Up

Wipe any excess G.P.S. from tile with a clean rag after application. DO NOT allow product to dry on tile.

STEP 3: Dry Time

Surface is ready for traffic in 2 hours. Keep area dry for at least 12 hours; cures completely in 24 hours.

Milwaukee

Extraordinary Innovation.

World Class Coatings...

Powered by Essential Polymers.

With over 40 years of experience inventing brand new polymers, Essential Industries has become a world leader in polymer innovation and floor care technology.

While Essential's primary focus is in floor care products, its strength in Research and Development has enabled it to create designer polymers and resins for diverse customers in industries from floor finishes, paints, concrete, plastics, detergents, adhesives and printing ink technologies. To date, it remains the only U.S. floor finish producer that creates and produces its own acrylics, polyurethanes and hybrids in its two state-of-the-art factories.

Reno

GROUT Restoration SYSTEM

A fully-loaded grout system engineered to specifically target, remove and then lock out the dirt and soils that make grout so difficult to maintain.

Innovation
is Essential.

GROUT AVENGER

Cleans - Whitens - Maintains

Special formulation designed to target and break down water scale, soap scum, bodily fluids and soils while "lifting" it out of the grout.

- Safe for use on all grouted tile floors
- Includes malodor counteractant package to eliminate odor
- Will not stain grout or tile
 - Use for periodic heavy cleaning or regular maintenance
 - No special equipment needed

STEP 1: Sweep Area

Sweep area and remove any large debris.

STEP 2: Dilute Chemicals

Dilute **Grout Avenger** with water. Follow recommended dilutions on the product label.

STEP 3: Wet Floor Signs

Place "wet floor" signs at any entrances to work area.

GROUTED TILE FLOOR CLEANING PROCEDURE

STEP 5: Scrub Floor

Using a low-speed rotary floor machine with brush, or a cylindrical brush floor machine, scrub grout and tile thoroughly.

STEP 4: Apply Solution

Liberal apply cleaning solution using a mop. Let dwell 10-15 minutes before scrubbing. If cleaning a large area, break it up into sections to prevent grout resoiling or floor drying.

STEP 6: Remove Solution

Remove solution with a wet-vacuum or use a squeegee to push the solution into a floor drain. Flood the floor with clean water, if needed, to flush rinse the floor properly.
