

CAPTAIN ESSENTIAL TO THE RESCUE!!!

The floor finish in this hall keeps peeling and chipping! Why is it happening? How do we prevent this on other floors in this school?

Time for another THRILLING episode of... /

ZAP

CAPTAIN ESSENTIAL

NEVER FEAR!
Essential Industries' AMAZING products and procedures will save you!

THIS FLOOR APPEARS TO BE CONTAMINATED!

The villain is most likely salt residue or using disinfectant instead of floor cleaner!

So what do we do about it, Captain Essential?

POW! Top scrub the floor with Citrus Scrub 'N Shine using a blue or SP pad to remove the contaminated finish!

BAM! Rinse with Blue Concentrate, which neutralizes any salt residue. DO NOT USE DISINFECTANT!

BOOM! Let the floor dry and it is ready for recoating!

Our school's floors look amazing again! Thanks to Citrus Scrub 'N Shine and Blue Concentrate!

Be sure to keep your floors looking AMAZING by cleaning daily with Blue Concentrate - NOT DISINFECTANT!

TRUST IN ESSENTIAL!
