

What Our Customers Say

G2 Green Finish

8201FF High Performance Floor Coating

"I had tried no less than four previous floor finishes that claimed to be 'Green.' While they may have been, the performance lacked in one or more areas with each different product. All of these issues do not present themselves with G2 Green Finish. I have been more than pleased with the results of G2 Green Finish, so much, that after an initial trial run at one school, we now use the finish in all 87 of our schools."

Brian L. Hoover, Custodial Services Supervisor
Loudoun County Public Schools – Leesburg, VA

"Montgomery County Public Schools has been using G2 Green Finish and Green Strip for over three years. We have been satisfied with the quality of performance and plan to continue using these products in the future."

Larry Hurd, Building Service Trainer
Montgomery County Public Schools – Rockville, MD

"We decided to implement Essential G2 and Green Strip throughout our district into thirty sites. Our Superintendent of Schools, Facilities Supervisors and many other personnel are amazed at the overall appearance of our sites with special admiration for the gloss of our floors."

Michael N. Preston, Assistant in Facilities/Operations
Brian Rimel, Assistant in Facilities/Operations
Cecil County Public Schools – Northeast, MD

"We implemented Essential Industries G2 Green Finish over four years ago. We have been very pleased with the overall product performance. G2 maintains a high gloss appearance that all occupants and visitors appreciate, and it responds well to dry burnishing. Due to the quality of this product, this program has been rolled out to all 230 schools within the school district."

E. P. Dent, Building Supervisor VI
Eleanor Roosevelt High School – Greenbelt, MD

ESSENTIAL INDUSTRIES

High Performance Floor Coating

With over 40 years of experience inventing brand new polymers, Essential Industries has become a world leader in polymer innovation and floor care technology. To date, it remains the only U.S. floor finish producer that creates and produces its own acrylics, polyurethanes and hybrids in its two state-of-the-art factories.

Continuing to think forward, Essential focused it's R & D efforts on developing environmentally-responsible products. Essential's G2 Green Finish is a high performance, industry-leading coating which will astound you with its performance. From its ease of application (and low odor) to its brilliant gloss and unmatched durability, you will swear you are applying a non-green, high-performance coating.

G2 Green Finish is a Green Seal™ certified, high solids floor finish and sealer. It protects and beautifies all floors, including vinyl tile, terrazzo and stone substrates. G2 Green Finish applies easily, dries quickly to a high gloss and repairs easily. It is for use with all maintenance systems, including no-buff, spray buff and high speed burnishing.

"The black mark resistance of G2 Green Finish is better than any regular finish we use. In addition, the lay-down gloss is spectacular and the dry time is fantastic."

Toronto Distributor

Superior Floor Care with Less Environmental Impact

- Environmentally-responsible, yet performs equal to or better than a standard floor finish
- Combines deep gloss, high durability and ease-of-use into one product
- Non-yellowing, low maintenance formula offers excellent black mark and scuff resistance
- Use on vinyl, linoleum, terrazzo, quarry tile, laminate wood and sealed concrete floors
- Contains no added butyl, harsh alkalies, zinc, phthalates or APEO surfactants
- Low odor - low ammonia
- Low 1.0% VOC content meets CARB requirements
- Ideal for limited maintenance programs, yet responds to burnishing, if desired
- Perfect for classrooms, patient rooms, offices and retail establishments
- Exceptionally fast dry time - 20 minutes under normal conditions
- Slip-resistant – UL-classified
- Green Seal™ GS-40 certified

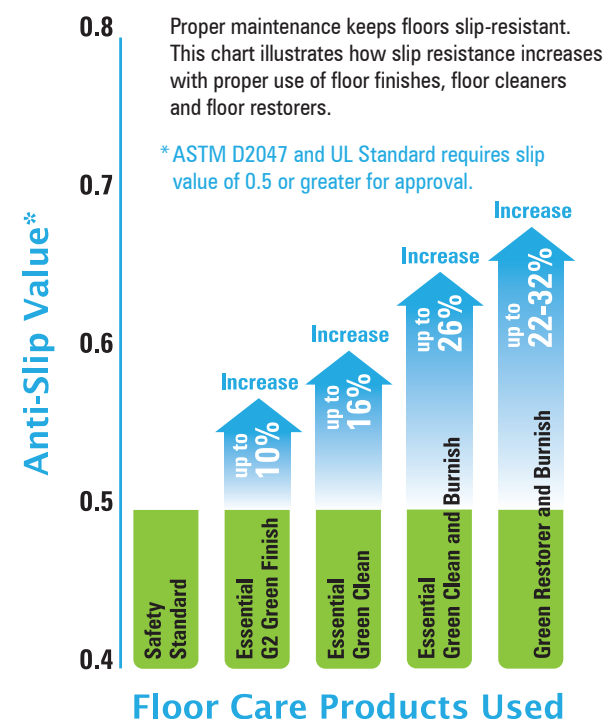

Gloss and Black Heel Marking Comparison

	Essential Industries G2 Green Finish	Leading Competitive Green Finish	*BHMR (Black Heel Mark Resistance) is a Snell Capsule test. White vinyl composition tiles are given two coats of finish with a 30-minute dry time between coats and a 60-minute dry time after the second coat. The tiles are put into a Snell Capsule, which is a tumbling device, and rotated for five minutes. Inside the Snell Capsule are a number of black rubber cubes that simulate foot traffic. This enables us to measure the BHMR of a finish. The number represents the number of black marks present on the tile.
Solids	20%	18%	
Gloss - 1st Coat	30%	32%	
Gloss - 2nd Coat	56%	54%	
Gloss - 3rd Coat	71%	68%	
Gloss - 4th Coat	81%	72%	
BHMR*	18	42	

"G2 Green Finish was applied to a busy hallway. Even with limited maintenance - no auto-scrubbing or burnishing, just damp mopping - the hallway is not attracting black marks or soil. It looks incredible."
